

F4200N.2 Promotional Sale

For a limited time, we are offering the promotion of the Fisnar® F4200N.2 Benchtop Robot, DC50 General Purpose Dispenser, as well as manual Tip Alignment Kit (TA360U-KIT) together for a discounted price of €4,495.00. Also included is Fisnar® universal syringe holder assembly (560920U) suitable for mounting all syringe barrel sizes (3, 5, 10, 30, and 55cc). Lastly, as part of this promotion we also include the QK-RSK (Quantx Robot Consumables Selection Kit) for in-depth evaluation of all the various Fisnar® syringe barrels, pistons, adapter assemblies, and accessories.

The Fisnar® F4200N.2 is a compact and ergonomically designed benchtop robot created to support most general dispensing applications requiring a high-performance standard and consistent, repeatable results. Paired together with a Fisnar® DC50 General Purpose Dispenser, the combined system is designed to suit a wide variety of dispensing applications from microdot deposits and lines via the easy-to-program teach pendant included with this deal.

To conform to European CE safety regulations (Machinery Directive 2006/42/EC), the Fisnar® F4200N.2 robot must be integrated into a safety enclosure (sold separately).
